1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10-13-2006 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harry E. Moose, Jr. on December 19, 2006.

The application has been amended as follows:

In the claims:

In claim 14, line 10, "at least" (first occurrence; i.e. before "a portion") has been deleted.

Summary of above noted December 19, 2006 Interview: Agreement was reached on the above noted change proposed by the examiner to claim 14 to make the same change already made to analogous claim 1 to avoid any issues of potential new matter and place this application into condition for allowance.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The claims are allowable in view of the amendments made in the 10-13-2006 amendment for the reasons advanced by applicant in the remarks accompanying the 10-13-2006 amendment. Additionally, it is noted with respect to the 11-13-2006 Information Disclosure Statement that this prior art is either less relevant or cumulative to the prior art of record. Further, although prior art such as EP 1048492 disclose encapsulating a power source and a portion of a connecting terminal (note battery 30 encapsulated in encapsulation material 40 and plug 38), this encapsulation material 40 "provides a rigid protective shell" as distinguished from attachment patch 46 that is formed from rubber, it being considered clear that the ordinary artisan would have understood that encapsulation material "40" in EP '492 is not rubber, this being in contrast to the present claims which require that the power source be embedded into rubber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geoffrey L. Knable whose telephone number is 571-272-1220. The examiner can normally be reached on M-F.
